# **PRS-CSI Call Station Interface**

www.boschsecurity.com

The PRS-CSI is an interface between a single remote call station, PRS-CSR, or a remote call station kit, PRS-CSRK, and the fiber optical Praesideo network. It uses CAT-5 cable for the connection to the remote call station. The CAT-5 cable, carrying digital audio and control data, can be as long as 1 km. The length of the CAT-5 cable is not a part of the Praesideo optical network length. This considerably increases the overall possible length of the optical network, especially in cases, where the call station is located far from the rest of the system.

The call station interface can get its power from the Praesideo network, and/or from a local power supply. It is fully supervised.

#### Functions

The interface can connect a single PRS-CSR remote call station or PRS-CSRK remote call station kit to a Praesideo system with up to 1 km of CAT-5 cable. The interface is fully digital, supporting high-quality sound with a built-in DSP for audio processing of the remote call station. It supports complete supervision of itself, the call station, and the connection, as well as of two control inputs. It supports the fail safe mode

- Connects a remote call station to the Praesideo network via CAT-5 cable (up to 1 km)
- Powered by the Praesideo network and/or local power supply
- Two supervised control inputs
- Built-in DSP for audio processing functions
- Complete supervision of the unit

of remote call stations, allowing them to put through emergency calls, even if the network controller fails. The unit is configured via the network controller.

#### **Controls and indicators**

- Two LED indicators for power and network status
- Two jumpers (below cover) to separate power supply of call station interface and remote call station

#### Interconnectors

- Two Praesideo network connectors
- RJ45 connector for CAT-5 connection
- Kycon type (lockable) connector for power and two control inputs

# **Ordering information**

#### **PRS-CSI Call Station Interface**

an interface between a single remote call station, PRS-CSR, or a remote call station kit, PRS-CSRK, and the fiber optical Praesideo network. Order number **PRS-CSI** 

# Accessories

# **PRS-CSR Call Station Remote**

same functionality as the basic call station, LBB 4430/00, but it uses CAT-5 cable for its connection to the Praesideo network Order number **PRS-CSR** 

#### **PRS-CSRK Call Station Remote Kit**

same functionality as the remote call station, PRS-CSR, but without its housing and other components Order number **PRS-CSRK**
